PREVIEW:

A generic rock model and textures. Fit for sandy desert scene, but textures can be adapted for any environment. For example, if you hue-shift the texture you can make the brown sand look like green moss for a forest scene.

Usage Case

Originally made in 40 minutes for a quick art-jam exercise.

Of course! Everything I have on here is Public Domain - you can do anything you want with it.

I'd love to see screenshots of your stuff if you end up using it :)
